

Eva Reyes

Riverside, California | (760) 261-3634 | ereye091@gmail.com | [linkedin.com/in/eva-reyes-841278255](https://www.linkedin.com/in/eva-reyes-841278255)

Education

University of California Riverside B.S & M.S Bioengineering expected June 2026
Relevant Coursework: Biomechanics of the Human Body, Circuits and Electronics, Bioinstrumentation, Bioinstrumentation Lab, Biotechnology & Molecular Engineering, Quantitative Biochemistry
Awards: Dean's Honors List (2023)

Technical Skills

Hardware & Instrumentation : Circuit Design & Assembly, Embedded Systems, Sensors & Instrumentation, Biomechanical Textiles, Soldering & Rework, CAD modeling

Software & Programming: Arduino Programming, COMSOL, Python Programming, Debugging, Data Protocols

Laboratory Techniques: Protein Purification (Affinity Chromatography), Protein Expression in (*E.coli*), Electroporation, Gel Electrophoresis, Western Blotting, Mini-Prep, Competent Cell Preparation, Microbial Culture & Plate Spreading, Centrifugation

Research Experience

Biotechnology Laboratory, UCR

Undergraduate Research Assistant

September 2025 - Present

- Produced molecular cloning workflows by preparing high efficiency competent *E.coli* cells and performing electroporation for plasmid transformation utilizing precise instrumentation and diagnostic protocols
- Isolated and purified plasmid DNA from bacterial cultures using mini prep techniques, yielding high quality DNA for sequencing and downstream analysis
- Maintained strict quality control and calibration through aseptic techniques in procedures including microbial culturing, centrifugation, and plate spreading to maintain sample integrity and prevent contamination

Projects

Smart Compression Sleeve

Senior Design Project, UCR

September 2025 - Present

- Collaborated within a multidisciplinary engineering team to design and fabricate a wearable smart compression sleeve integrating IMU, EMG, and PPG biosensors for motion and physiological monitoring.
- Conducted IMU validation testing and statistical analysis across exercises including bicep curls, hammer curls, and overhead tricep extensions to evaluate good vs. bad form detection, sensor reliability, and experimental validity.
- Assisted in embedded systems coding, biosensor integration, and hardware troubleshooting for Arduino-based systems by resolving signal dropout, I2C/analog communication issues, and faulty circuitry through rewiring, continuity testing, soldering rework, and pull-up resistor optimization.

Leadership Experience

Biomedical Engineering Society Officer (BMES), UCR

Internal Outreach Chair

September 2024 - June 2025

- Collaborated with three other engineering student organizations to organize **BNGO (Bourns College Engineering Outreach) Day**, a large-scale K–12 outreach event designed to inspire interest in STEM through interactive, hands-on experiences.
- Led the development of BMES's event theme and designed bioengineering-focused activities that engaged students in understanding fundamental concepts through real-world applications.
- Attended weekly planning meetings to coordinate logistics, brainstorm ideas, and ensure cohesive programming across all organizations involved.

Work Experience

Financial Aid Office, UCR

Peer Advisor

January 2024 - Present

- Provided dedicated support to students by answering phone calls and emails related to financial aid inquiries.
- Guided and assisted students through the FAFSA process, financial aid requirements, and any resounding issues.
- Collaborated with a team of advisors to share knowledge and ensure accurate and timely assistance.

Mail Distribution Services, UCR

Student Assistant II

September 2022 - January 2024

- Managed the sorting and distribution of mail and packages for on-campus departments, ensuring timely and accurate deliveries.
- Assisted customers with outgoing mail and package shipments, providing excellent service and guidance.
- Collaborated with team members to organize and streamline mail-sorting processes and maintained a high level of organization in handling campus mail services
